

Main

Ask the user for  
the grades

Display the avg for  
a student with a  
nested loop and  
studentID being  
the VID of the  
student divide by 4  
(to represent the 4  
exams)

Get the class avg  
for an exam by  
adding a column  
and dividing by the  
SUM

Class avg by  
adding all columns  
and dividing by  
size

Loop through  
entire array and  
print contents to  
text file

Reset array to 0  
and recreate the  
gradebook file

Attempted to save  
as binary but had  
trouble with the 2D  
array.

End
